OBJECTIVES

- To overview and update the scientific research progress in the field of Microbial Biotechnologies and their applications.
- To promote the exchange of experiences and knowledge between national and international scientists and practitioners in the field of Microbial Biotechnologies.
- To inform and disseminate recommendations to the stakeholders, decision makers and private sector companies on the importance of Microbial Biotechnologies in the development of vital sectors especially the agro-industry, agriculture and the protection of the environment, human health, animal health, vaccination and recent advances in biotechnology.

CONGRES MAIN THEMES AND TOPICS

- Theme I: Microbial Biotechnology and Human Health: bioactive substances for medical biotherapy, innovative therapy.
- Theme II: Microbial Biotechnology and Animal Health: Control measures, Vaccination strategies.
- Theme III: Microbial Biotechnology and Environment: Treatments and processing of liquid and solid wastes.
- Theme IV: Microbial Biotechnology in Agriculture, Agri-Food and Bioindustry: Agri-Food and Agribusiness, Genetic improvement, Biopesticides, Plant-microbe interactions and Crop improvement, Biological control, Animal production, Food security.
- Theme V: Recent advances in Biotechnology and Plant Genomics, Genetics and Biotechnology.
